

The FCC should either expand the do not call list to either match or exceed the standards currently in place in the state of New Jersey. Please include all telephone surveys, political campaigns and telemarketing as an illegal act when contacting anyone who has signed up on any "Do Not Call" list. I am a volunteer firefighter and also run on an ambulance squad, if I have been out all night on a call and I am trying to sleep in for an hour or two before going to work, I do not want someone calling me at 9:30 in the morning to try to get me to switch my phone service. It is harassment and it should be prosecuted accordingly. Telemarketing should not be allowed in this country since it is a violation of our citizens privacy in the sense that we are not able to go home and avoid the onslaught of advertisements that are a constant bombardment on television, radio, billboards, newspapers, sporting events and even while we are at work through pens and paper "donated" by drug manufacturers, automotive dealerships and other large corporations trying to spend more money on getting their name out there. Where will we draw the line? Make all Telephone and E-Mail advertisement illegal and remove one of our many stresses in life.
